**THE ONLY SOURCE FOR
ALPHA AND CORONA
STATIC CONTROL SOLUTIONS**

For over 40 years, NRD has earned the trust of organizations worldwide for safe, reliable, innovative solutions for electrostatic concerns. We approach everything with a customer-first attitude, working with each organization to find exactly the right solution for their unique needs.

To find the solution that's right for you, contact an
NRD representative for a consultation at **1-716-773-7634 ext 320**

LABORATORY

Every situation is unique. So is every solution.™

IF ACCURACY IS A CONCERN IN YOUR LAB

STATIC MAY BE YOUR CULPRIT

Most people don't realize it but, electrostatic discharge can wreak havoc in a laboratory if left unaddressed. It can severely disrupt accuracy and material handling, causing "clinging" and "jumping," when weighing fine powders and weigh samples. In fact, **static is one of the leading causes of inaccurate measurements when using a precision or analytic balance** which can have huge financial and safety implications.

NRD provides both alpha and corona solutions that eliminate static in your work area, without creating an unstable environment for your samples. However, because of the unique needs of a laboratory environment, **alpha is the natural and safe solution** to improve accuracy, resolution and repeatability.

- R&D, Forensics, Analytical Weighing, Precision Weighing, Microscopy
- Helps create accuracy in lab environments
- Eliminates "clinging" and "jumping" of static prone samples and tools
- Ensures stability when parts counting, compounding and filtering
- Fast and easy to use solutions
